Automated Credit Recovery – Cost Estimation

This document provides a high-level cost estimation for implementing the Automated Credit Recovery and Intelligence Initiative as described in the BRD. Costs are indicative and subject to vendor negotiation.

Cost Component	Description	Estimated Annual Cost (USD)
Communication APIs	SMS, WhatsApp & Voice (Twilio/Infobip)	40,000 – 70,000
Auto-Dialer Platform	Genesys / Avaya Cloud Dialer	25,000 – 45,000
Workflow Automation	UiPath / Custom Python Services	20,000 – 35,000
Analytics & Reporting	Power BI Licensing & Setup	10,000 – 18,000
System Integration	Core Banking, CRM, Payment APIs	30,000 – 50,000
Security & Compliance	NDPR, Audit Logs, Access Control	8,000 – 15,000
Infrastructure	Cloud Hosting & Monitoring	15,000 – 25,000
Implementation & Support	Project delivery & first-year support	20,000 – 30,000

Total Estimated First-Year Cost: USD 168,000 – 288,000

Expected ROI is driven by a projected 60% increase in recovery rate and significant reduction in manual recovery operations within 12 months.
