## Summary

Recent B.Eng. Electrical/Electronics Engineering graduate and Web3 developer with hands-on experience in blockchain and software development. Gained practical knowledge of elevator electrical systems at Kresta Laurel and developed web applications using C#, ASP.NET, JavaScript, PHP, Laravel, and React.

## Experience

Aug 2025 - Present

### Internship Training

*United Bank for Africa (UBA)*

Interning at the Chief Information Office (CIO) as a Software Developer, contributing to the development of internal applications using C# and ASP.NET. Works alongside senior developers to write clean, efficient code and take part in projects that improve existing systems. Gaining practical experience across different stages of the software development process, including debugging, testing, and deployment. Also supports the Business Analyst team in understanding business needs and how they translate into technical solutions.

Jan 2024 - Apr 2024

### Internship program

*Kresta laurel*

Assisted with the installation and testing of elevator electrical systems including wiring, control panels, and motor drives while working closely with engineers and technicians to keep each project safe, on schedule, and running smoothly.

## Education

2020 – 2025

### University of Benin, Benin city, Edo state.

Bachelor of Engineering - B.Eng, Electrical and electronics engineering.

*Second Class Upper*

2017 – 2019 **Federal Government College Odogbolu**

## Skills

Blockchain Development: Solidity, Foundry, Hardhat, Software development: C#, ASP.NET MVC and WebAPI, Web Development: JavaScript, TypeScript, React, HT

## Hobbies

- Blockchain Development: Solidity, Foundry, Hardhat, Ethers.js v6, Chainlink (VRF, Price Feeds, Automation, CCIP), ERC-20/721/1155, smart-contract security
- Web Development: JavaScript, TypeScript, React, HTML/CSS, PHP, Laravel, REST APIs, wallet integration.
- Software development: C#, ASP.NET MVC and WebAPI
